Are you protecting your most
precious assets?

When you or your keyholders are called out to
site, who knows they have returned home safely?

This innovative service makes sure we know if there
is a potential problem or risk and allows us to notify
your emergency contacts quickly to get help.

How the service works

1. Your alarm activates and the Alarm Receiving Centre calls your chosen keyholder
2. A text message is sent to your keyholder giving a 1-hour time window to attend site and return home safely (don't worry, if you need longer, you can extend the time window to suit your needs)
3. You will need to call the Alarm Receiving Centre within your time window to let us know you are safe. We will send you a text 10 minutes before your time expires as a reminder
4. If you are unable to carry out these actions, your chosen emergency contact will be called and made aware that you may be at risk

£00.00
Per annum, per site

(Insert your price here
RRP £80.00 P/YR)

The benefits to you
